EDUCATION

- Faculty of Economy/ Business Administration - Damascus University 2019 - 2023
- Fifth year Information Technology Engineering - Syrian Virtual University 2020 - until now

EXPERIENCE

Front End Developer - Focal x

7/2023 – 12/2023

I trained at focalX company for six months by completing weekly tasks using React. I scored 80/100 and I got a letter of recommendation.

Front End Developer - EduBridge

5/2024 – until now

Responsible for building a responsive website from scratch using React and integrating front-end components with backend services through APIs. I am fully responsible for the front-end department, managing the code. Currently, I am working on developing it using newer technologies like Next.js.

Front End Developer – Code Services

1/2024 – until now

I am working remotely with a team as a junior Frontend developer to create interactive and responsive web interfaces using React.js and Next.js. I also work closely with UI/UX designers to translate design mockups into functional web components and with backend services through APIs.

TRAINING COURSE

FullStack Developer-new horizons

1/10/2022 – 1/4/2023
